Barber Quarters				
51	1892 AU nice original color w/ some very light obv hairlines. This coin exhibits the type 1 rev w/ most of the E of UNITED visible beside the wing-tip. It is the scarcer of the two reverse varieties for Barber Quarters of 1892.	EST P	85-110	SE

LOT	U.S. COINS		VALUE	
52	1901-O XF. Nice detail and slightly proof-like fields. Light surface hairlines indicate an early cleaning though now naturally recolored. A very scarce date especially in the high circ grades. Bowers comments that this coin is "...underrated in higher circulated grades, and VF to AU coins are very scarce. This is often one of the last issues collectors need to complete a set, [outside of] 1896-S, 1901-S, & 1913-S."	EST P	475-600	SE
53	1908-D AU50 original.	EST P	85-110	SE

58	1932-S XF+	EST P	80-110	SE
59	1937-S MS60+ perhaps a few very light hairlines upon magnification.	EST P	125-150	SE
60	(97) Diff 1932 // 1974 in an LOC Vol 15 album. All silver except for (15) clad issues. Early ones are strong VG to XF w/ many higher-end, later ones better to Uncirculated. Lot also contains the 1934 Double Die Obverse issue (VG) taped to the back page of the album. Well worth inspection!	EST P	440-550	B
61	(36) Diff 1946 // 1959-D circ grades in a Whit 9031 folder. (\$9 face 90%)	EST	135-165	SE
Bust Halves				
62	1828 Sq 2 Lg Letters O-114a VF. Careless wiping leaves hairlines obv & rev, but the overall appearance is still good.	EST	60-80	SE
63	1834 Small Date, Small Letters O-111 VF+ original dark grey.	EST P	90-115	SE
64	1835 O-106 MS60+. Lovely original w/ medium to dark grey-brown toning.	EST P	700-1,000	SE
65	1838 Reeded Edge near XF original color w/ a few marks.	EST P	135-160	SE
Seated Halves				
66	1842-O Small Date; Small Letters Reverse XF or very nearly so. This rare issue was created at the New Orleans mint when a reverse die of 1841 was inadvertently used in 1842. The Red Book estimated mintage is noted at 203,000, but this must surely be an error given the overall scarcity of this coin. Bowers notes that most of the few surviving specimens are low-grade suggesting a release to commercial channels shortly after mintage. A higher grade specimen (though seawater etched) was recovered from the wreck of the US New York that sunk in the Gulf of Mexico in 1846. The current example shows modest wear on the thigh, lighter wear on the band of LIBERTY, and rev wear concentrated mostly on the wing tips. Emanating from an old PA estate, this is a beautiful specimen of this rare issue, and a great opportunity for the Seated Liberty enthusiast to own a really great coin.	EST P	2,200-3,000	SE
67	1853 Arrows & Rays original XF. Great example of the one-year type.	EST P	170-210	SE
68	1855-O Arrows MS60+ perhaps better. Medium dark blue-brown toning on lovely original surfaces w/ excellent high point detail. Another beautiful coin from the PA estate that consigned several excellent coins to this auction and a few of the preceding ones.	EST P	700-1,000	SE
69	1859-O XF	EST P	120-145	SE
70	1877-S NGC AU53 pure white. A wonderful candidate for a type coin.	EST P	140-175	SE
71	(6) Diff commons 1861-O // 1876 all AG to G+ originals. The half dollar was routinely used in the channels of commerce after 1875 and circulated widely. Seated halves were common in circulation thru the 1920s. They began to disappear when coin collecting (from circulation) became popular in the 1930s. But their long-time use as a medium of exchange explains why many of them (along with the Barber series) are so worn. Too bad they can't talk and tell us where they've been and how they were used.	EST	170-210	SE
Barber Halves				
72	1892 AU original. There are some light scratches on Liberty's neck and around the eagle's neck on the rev.	EST P	200-240	SE

LOT	U.S. COINS		VALUE	
73	1896-O Fine by wear and perfectly original but a few deep scratches are evident on Liberty's head between the ear and eye, and a couple on the cheek. They blend in well with the coin's overall color which is exceptional.	EST P	90-115	SE

108	1884-CC AU58 perhaps better. Rare to see an 1884-CC in this condition as this in one of the rarest Morgans to find circulated. 85% of the entire mintage was represented in the 1970s GSA sales and all were uncirculated.	EST P	200-240	SE

112	1890-CC NGC G6. Well-worn but beautiful color and originality.	EST	80-100	SE
113	1893 AU lustrous and reflective. The 1893 is a scarce issue in the Morgan series (mintage of only 378,000) as Grover Cleveland, elected president for a second time in 1892, carried out his campaign promise to repeal the Sherman Silver Purchase Act which drastically reduced silver dollar output for 1893 thru 1895.	EST P	320-370	SE
114	1895-O F+ attractive original dark grey w/ lighter highlights. Mid-grade coins are usually the rule for the scarce 1895-O as it is easily a five-figure coin in mint state.	EST P	200-240	SE
115	1898-O PCI MS65. Snow white and beautiful.	EST P	120-145	SE
116	1899 PCI MS63. The low-mintage 1899-P has been an enigma in numismatic circles for years. The official mintage of 330,000 pieces is only about one-twentieth of the surrounding years from the Philly mint. The coin, though scarce overall, is more available than this ratio might suggest. Wayne Miller, author of the Morgan and Peace Dollar Textbook, has opined that a significant number of 1899 dollars may have been struck in 1900 (and counted as part of the 1900 mintage) due to the difficulty the mint would encounter changing the date on any existing working dies of 1899 to 1900. (This could have been the case for other mints as well.) However, any concrete evidence of this practice has not survived to the present day. What is known is that 1899-P Morgan dollars are scarcer than any of the neighboring P-Mint coins.	EST P	240-280	SE
117	1904-S AU. A very pleasing coin that would fit well in a set that had mostly Unc coins. Scarce date especially in higher grade as even AU58 coins are worth 3x that of AU50s.	EST P	575-750	SE

137	1883-O BU Roll (20 coins) all beautiful white MS60 to 63 w/ heavier toning on the two end coins. Released sporadically from the time it was minted, the 1883-O was never a scarce date. Bowers estimates that about 2 million were added to the existing number during the great 1962-1964 Treasury dispersal. But in the ensuing decades most ORIGINAL bags and rolls have been broken up rendering most rolls on the market today "put-together". The coins rarely have matching characteristics. But this roll IS original - the coins all look the same - flashy white uncs w/ average bagmarks and toned end coins. The consignor obtained them in the early 1970s. They essentially haven't been touched for the last 50 years.	EST	850-1,050	HWC-ROLL
138	1898-O BU Roll (20 coins) all beautiful white MS60 to 63 w/ a bit of toning on the two end coins. The history of the 1898-O is an interesting one. Never released for circulation, it was a very rare date prior to 1962, and the Red Book valued it at \$300 in mint state, which was double the price of an 1889-CC! Then came the 1960's Treasury release and perhaps as many a million shiny, new 1898-O Morgans entered commercial channels. It is interesting to note that because so few were known before the release, the 1898-O is one of the five scarcest Morgan Dollars in CIRCULATED condition (the others being 1884-CC, 1885-CC, 1903-O, & 1904-O.) Finding one with any appreciable wear is nearly impossible. But because mint state coins are so common, the value of a circulated 1898-O is driven down to only a small amount over bullion.
